Here you go. Like I said, I am not recommending that the Assembly table the resolution; I was trying to indicate that I had "heard" what Thom said.

**Subject: Re: Helski Map changes**

That is correct, no additional areas added along the Chilkat Inlet, 1 - 6 which includes the Pyramid Valley. These are topographic amphitheaters which increase the noise. As far as number 4 is concerned I have no opinion.

Hi Thom,

Your email, in the Assembly packet, says that you would like the Assembly to at least reject the changes "at lower elevations along the Chilkat Inlet." Would you mind identifying these locations by number? I think you are referring to numbers 1-6. Can I assume you support #4 - removal in the Kicking Horse area?

The Assembly may very well table the resolution as you suggest, but in case they don't, I think it is useful to target specific recommendations.

Thanks.
