Dear Borough,

Quiet space should not be something that could disappear. Everything has limits, with few exceptions such as eternity. The Haines Borough is a large part of the earth. People, philosophy and religion need to be considered always. People need to know the areas that they can go and be where there is natural quiet. Quiet rights need to be defended. Areas need to be established for the various user groups. There is plenty of space. Draw lines and put a ten year moratorium on change.

Sincerely,

Bill Holton
