**Subject:** Comment to Assembly re helicopters

Dear Mayor Hill and the Haines Borough Assembly,

I understand that consideration of expansion of heliskier-days will be brought before the Assembly and I am writing to urge you to not take action on this issue.

The number of skier days was more than doubled just four years ago. During that time there have been fatalities related to heliskiing.

Expansion of this industry should not be considered until a history of safe operations is established.

I also understand that some of the heliski companies seek to limit access to other heliski companies to create a monopoly for themselves. This is a very bad idea.

I also urge that if a member of the assembly has a financial involvement in the heliski industry that member not be permitted to vote on these matters due to their conflict.

Thank you.
