Alekka

Could you forward this to the GAS committee. Thanks

Committee members

I am trying to do my due diligence on this ordinance rewording and have a few other suggestions to my original rewrite that I sent out a couple days ago after researching and talking to more citizens. The additions are to the exemption area.

Exemptions

1. Add fuel oil and ethanol in addition to fuel. These are all carbon based fuels
- 2 increase the min amount allowable up to 5000gallons
3. Remains the same

Thanks

Will
