Subject: Garbage

Please make sure the assembly members get a copy of this letter in their packets.

Will a single person be expected to pay as much as a family? The price for enforced trash pick up thrown out is \$40/month. More than 3 times what it currently costs me to haul my own. At that rate I will stop recycling, seems counter to your better for the environment argument.

Who will provide the bear and raven proof garbage cans? When people put their garbage out the night before and the garbage monopoly doesn't pick it up right away, who will deal with the increased bear activity? Will we be providing new trucks for the garbage monopoly? Will public facilities be plowing all the roads early and with no berms so we can put our trash cans by the side of the road on our mandated day?

Does this only apply to the residents of town?

My water bill has gone up, there's been an increase in the rate we pay for electricity, property taxes aren't going down. Perhaps working on the illegal dumping problems would make more sense.
