Dear Haines Borough Administration and Haines Assembly Members,

We need to have more discussions as a community about the future of the Lutak Dock. Anyone living along the highway and in town along the ore transport route would be severely impacted by mining trucks transporting ore to Lutak Inlet.

We need to have more discussions about transforming the Haines Highway scenic byway and bald eagle preserve into a haul road. We need to talk about impacts to the commercial fishing industry and tourism industry.

The Lutak dock rebuild approved by community members was to rebuild the dock for safety reasons, not to transform Lutak inlet into an ore transfer site. Please don't rush this process in the interest of saving money.

In the interest of representing a wider range of community members, as opposed to foreign mining interests, I implore you to **please take no action** on phase 3 of the Lutak Dock. Let's discuss things openly, and give this latest concept the transparent public process it deserves.

Thank you for your service to this community and your thoughtful consideration,  
Macky Cassidy
