I was on the ports and harbor advisory committee and the planning commission. These committee's have been working on this dock project for approximately 10 years. The borough has put in for 2 or 3 grants in that period of time and was turned down until the last grant with Mirad and with Turnagain Construction. We found out that they could do this project for near the same amount as scaled back previous project.

Why would you build a smaller dock that would cost you as much or more than the current plan. To me this all about the mine.

I SUPPORT THE CURRENT LUTAK DOCK DESIGN.

I do not know many hours I and other members has spent in meetings over this dock project. There was also lots of public meetings.
