Subject: Lutak dock

CAUTION: This email originated from outside of the Haines Borough. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

My husband and I want to support the Lutak dock rehab plan as is. The changes or making it smaller is not beneficial to our needs. The excuse of the Federal grant has issues, are a smoke screen to not get this work done. The dock is too small now to qualify for any ore materials or what needs we have to supply our food, fuel other needs as vehicle , furniture and needed items. No mine can use it for mineral storage or shipping, even with rebuilt too SMALL! We support the plan to rebuild repair, as preplan has been submitted. Sincerely Larry and Linda Geise

As a retired civil engineer, former Planning and Zoning member, resident of Haines for over 46 years, Larry knows the issues of changing any plan with Federal dollars involved. Stop the nonsense! I as a former City council member, Planning and Zoning member, aware of the issues, that can be involved, no change of plans, is the only solution to getting the job done. You have to preorder steel a year a head of needs, since almost all steel is made overseas now! Thank you for your time. Linda and Larry
