To Our Honorable Assembly Members: I would like to say that I believe the Assembly should support the Lutak Dock as it is currently designed. We have been trying to get this project done for more than ten years and now we have the funds to get the job done. The design we have now allows for this dock to be used if the Ferry dock is broken we could get the passengers off, it could also be used to tie up a cruise ship if we needed to. If you read some of the old studies you would see this dock is not designed to be an ore terminal and there is not the storage room at this site. We need this done now not after we have a failure and someone is severely injured or we have a loss of life. This is not an ore dock or was never intended to be quite listening to conspiracy theories. Thank you and Merry Christmas Jerry Lapp
