Hi Michelle,

I wanted to make sure you saw this recommendation re audio technology. I know that you have an interest in figuring this out!

Subject: Action minutes

Hi, Julie --

   I see that the subject of action minutes is back. I have the same comments I've had in the past; but I recognize that summary minutes are a huge time sink.

   I still think the community should have access to the reasoning behind the assembly's decisions, which is, of course, available by listening to the whole recording. But that recording is, of course, unwieldy.

   I am wondering whether there's some technology available with which you could 'bookmark' the recording as the meeting progressed. Maybe you could note, some way, when the assembly, for example, finished agenda item 11A and went to 11B, and then make the recording, with breaks, easily available. That way, I could upload or download the recording, look at the agenda, and go directly to the part of the recording in which I was interested.

   I see this program: http://www.libertyrecording.com/LMR_main.htm

   No clue what it costs, but it might be interesting to check out.

      Deb
