

Haines Community Risk Levels and Response - DRAFT

The Haines Emergency Operations Center is working to develop a recommended framework for managing Covid-19 in our community. Using this framework, we can establish parameters for how to operate within low, medium and high risk environments. This framework is modelled after the Alaska Smart Start 2020 program for our schools. **With your input, we can make plans for each of these environments, focusing on keeping our community safe and open, while protecting the most vulnerable and preserving our resources.**

Low Risk	No Laboratory confirmed cases in the last 14 days in Haines. Confirmed Laboratory cases in Alaska
Medium Risk	Some confirmed travel and community confirmed cases in town.
High Risk	Widespread community confirmed cases. Medical overwhelmed, resources used up, need outside help.

What do you want to see implemented as Borough parameters for safely operating in a low, medium, and high risk environment? What would you like to see the Borough recommend or require? Here are some ideas that we present for your feedback:
