July 07, 2020

PRESS RELEASE:

The Fire Danger Index for Haines has eased from High to MODERATE.

Open fires will be permitted as the relative humidity is rising and temperatures are on a cooling trend. Please file and follow the Burn Permit protocols. Have a water source "close at hand" or means of suppression available and do not leave any open burn unattended. As per the protocol, notify Dispatch prior to the burn and all open burns larger than a 10' x10' area must be inspected by the Fire Department prior to "lighting it off".

Please be advised that despite the low cloud cover, rising relative humidity and cooler temperatures, the risk of a wildland fire still exists.

Thank you very much,
Respectfully,

Al Giddings
Fire Chief - HVFD
