Commissioners and Assembly members,

We are requesting that you all vote to take no action until a thorough public process can be had.

The only plan the public has agreed to is a fix to Lutak dock for safety and functionality to meet OUR (the public's) existing needs.

We live out the highway and it is difficult to imagine as we look up and down this pristine valley that ore trucks and current environment and ecosystems can coexist as well as safety and noise pollution along our shared highway.

Clean water, subsistence foods, fishing, hunting and air quality are all things not worth trading for a foreign mine company.

Looking at Skagway's ore terminal situation, is this really a "road" we want as a community to go down?

Thank you,

Chris Nagy and Randy Konrad
